Product Benefits

The world's first laser cutter with color printing!

The Flux Ador™ offers colorful possibilities with the additional printing module. With CMYK + White, this addition allows you to laser engrave and color print all on the same machine.

Can be used with a variety of materials.

This diode laser can engrave and cut (varies by material) a variety of materials, such as wood, acrylic, leather, paper, cardboard, fabric, and some types of metals.

Built-in HD camera.

Easily take a photo of the entire laser bed for hassle-free alignment of your design files. Use the camera to view a live preview of the progress of the laser.
