Recommended Settings	
<i>Refer to the DTF Paper Instructions for best results.</i>	
Time	20-30 seconds
Temperature	320° F
Pressure	Medium-High
Peeling	Cold Peel

General DTF Instructions

- **Follow the DTF Paper Instructions for best results.**
- Print artwork on DTF Printer
- Apply DTF adhesive powder to artwork and cure according to DTF powder application instructions.
- Adjust press pressure to medium/high
- Preheat the heat press to 320°F or temperature specified per paper instructions.
- Print and place transfer sheet face down onto the surface of the product blank. Secure transfer with heat tape.
- Place the product blank with attached transfer sheet onto the heat press platen with the transfer paper on top.
- Place a piece of Teflon on top of the transfer paper.
- Close and press for the recommended time.
- When finished, open the press and remove the Teflon sheet.
- Using heat gloves, remove the product from the press.
- Peel the transfer paper off the surface of the product while the product surface is cool to the touch.

Tips and Tricks

- For best image placement, utilize the product template found on the product page on JPPlus.com.

Troubleshooting

- The image did not completely transfer to the product.
 - Slightly increase the press pressure.
 - The product may still be too warm when peeled. Wait a little more time before peeling the transfer paper.
- Ensure that the DTF paper used is compatible with the product material.
