

EASEL CUTTING BOARD – BCBEAS01, (13.5" X 7") BCBEAS02, (10.6" X 10.35")

This beautiful, easy care cutting board will offer a personal touch to your holiday entertaining and gift giving.

Settings

- 60 watt laser | Power - 45% | Speed – 70% | DPI – 600 | Lens – 2"

Laser Recommendations

- Place the bamboo cutting board onto the laser bed and align to the zero point on the laser bed. Adjust the laser focus to the surface of the cutting board.
- **Important:** It is recommended that the engraving artwork be set at least 1.5"-2" or above the bottom of the cutting board to prevent the laser head from striking the shelf on the bottom of the cutting board.
- Once the artwork is positioned, engrave using the suggested starting settings. (Settings may need adjusted depending on the laser tube wattage.)
- When finished, remove from the laser bed. If cleanup is needed, wipe the surface with a clean cotton cloth lightly misted with isopropyl alcohol. Avoid saturation of the engraved surface with alcohol.

Note: All settings are offered as a safe starting point for your fabrication. Minor adjustments may be needed to achieve optimal results.
