

METALLIC PLATED MUGS

DW202G, DW203S

An excellent option for corporate or personal gifts that your customers will love! These metallic mugs are coated with a high quality polyester coating designed specifically for dye sublimation. Hand wash only.

Settings

- **Time:** 120 seconds
- **Temperature:** 356° F
- **Pressure:** Moderate

Tools & Accessories

- Heat Tape
- Mug Press

Fabrication Process

- Affix the transfer to the mug using heat tape.
- Place sacrificial paper over the transfer.
- Place in mug press and press for required time. Pressure knobs are finger tight against product while closed in the press.
- After cure time, remove from press and set aside to cool. Water bath can be used for faster cooling.

Note

Use caution when removing from press. Product will be extremely hot.
