Settings

- **Time:** 120 seconds
- **Temperature:** 356° F
- **Pressure:** Moderate

Fabrication Process

- Place garment on press bed and cover with sacrificial paper. Press for 15 sec. to warm.
- Peel carrier off back of patch and position on garment. Rub sequins to lightest color side.
- Position printed transfer to the patch and secure with heat tape.
- Cover with sacrificial paper.
- Using moderate pressure, press the product. When complete, immediately flip the sequins to the other side.

Note:

- Only one side of the sequins can be sublimated.
