- Heat Transfer Printer
- Heat Transfer Paper for Hard Surfaces with paper instructions
- Standard Flat Heat Press- Swing-away style press recommended
- Heat Tape
- Teflon sheet or Blowout paper
- Heat gloves
- Recommended: Nomex felt pad

Recommended Settings	
<i>Refer to the Heat Transfer Paper Instructions for best results.</i>	
Time	60 seconds
Temperature	300°F
Pressure	Medium/heavy

General Heat Transfer Instructions

- **Follow the Heat Transfer Paper Instructions for best results.**
- Adjust press pressure to medium-heavy.
- Preheat the heat press to 300°F or temperature specified per paper instructions.
 - If using a heat pad, adjust temperature to 330°F.
- Print and place transfer sheet face down onto the surface of the ornament blank. Secure transfer with heat tape.
- Recommended: place a Nomex felt pad on the bottom heat press platen. Then place a piece of blowout paper on top of the Nomex felt pad.
- Place the ornament blank with attached transfer sheet onto the blowout paper with the transfer paper on top.
- Place a piece of Teflon or blowout paper on top of the transfer paper.
- Close and press for the recommended time.
- When finished, open the press and remove the Teflon or blowout paper.
- Using heat gloves, remove the ornament from the press.
- Peel the transfer paper off of the surface of the ornament while the ornament surface is still hot/warm.
 - The ornament should still be warm, but able to be handled without heat gloves.

Tips and Tricks

- For best image placement, utilize the product template found on the product page on JPPlus.com.
-

Troubleshooting

- The image did not completely transfer to the product.
 - Slightly increase the press pressure.
 - The product may still be too warm when peeled. Wait a little more time before peeling the transfer paper.
- Ensure that the Hard Surface paper used is compatible with the product material, as there are several types of Hard Surface papers available for different types of hard surface goods.
